

EA: SingleLogic-Long

Platform: MT4 | Strategy: Single Logic

Source file: SingleLogic-Long.mq4

File size: 13,148 bytes

DESCRIPTION

Single Logic Long-only EA for MT4. Simple but robust single-direction trading logic with risk controls.

STRATEGY TYPE

Single Logic

INSTALLATION GUIDE

1. Copy the .mq4/.mq5 file to MetaTrader folder:
 - MT4: ...\\MQL4\\Experts\\SingleLogic-Long.mq4
 - MT5: ...\\MQL5\\Experts\\SingleLogic-Long.mq4
2. Open MetaTrader → MetaEditor (F4)
3. Open the file in MetaEditor
4. Press Compile (F7) to generate .ex4/.ex5
5. Drag the EA onto a chart
6. Configure Inputs if needed
7. Enable AutoTrading (Algo Trading button)

IMPORTANT: Enable 'Allow DLL Imports' if the EA uses external libraries.

Always test on a demo account before live trading.

SOURCE CODE

The full open-source MQL4 code is available in the accompanying file SingleLogic-Long.mq4. Open it in MetaEditor or any text editor (VS Code, Notepad++) to study and customize the trading logic.

RISK DISCLAIMER

Forex trading carries significant risk. This EA is provided AS-IS for educational purposes. Always test on a demo account first. Past performance does not guarantee future results. The authors are not responsible for any trading losses.
