

# EA: Basket-Case

Platform: MT4 | Strategy: Hedge + Grid

Source file: Basket-Case.mq4

File size: 3,185 bytes

## DESCRIPTION

Basket Case EA — multi-pair hedging system (from Metatrader collection). Manages correlated positions as a basket with grid-like averaging.

## STRATEGY TYPE

Hedge + Grid

## INSTALLATION GUIDE

1. Copy the .mq4/.mq5 file to MetaTrader folder:

- MT4: ...\\MQL4\\Experts\\Basket-Case.mq4
- MT5: ...\\MQL5\\Experts\\Basket-Case.mq4

2. Open MetaTrader → MetaEditor (F4)

3. Open the file in MetaEditor

4. Press Compile (F7) to generate .ex4/.ex5

5. Drag the EA onto a chart

6. Configure Inputs if needed

7. Enable AutoTrading (Algo Trading button)

IMPORTANT: Enable 'Allow DLL Imports' if the EA uses external libraries.

Always test on a demo account before live trading.

## SOURCE CODE

The full open-source MQL4 code is available in the accompanying file Basket-Case.mq4. Open it in MetaEditor or any text editor (VS Code, Notepad++) to study and customize the trading logic.

## RISK DISCLAIMER

Forex trading carries significant risk. This EA is provided AS-IS for educational purposes. Always test on a demo account first. Past performance does not guarantee future results. The authors are not responsible for any trading losses.
